

JUST CLEANINGS

QUALITY OF 1943 CROP HIGHER

Some 631 samples of the earlier run of 1943 prairie wheat crop have been tested in the laboratories of the Board of Grain Commissioners. The average protein content was 13.5 per cent, or one per cent higher than average for samples collected last year from the same shipping points.

BRITISH FLOUR PURCHASES

Britain has contracted for the purchase of a million tons of Canadian wheat flour to be delivered in the shortest possible time and also for 500,000 tons of flour from Australia delivery of which will have to be made within the next year, Canada's problem, according to Hon. J.A. MacKinnon, minister of Trade and Commerce, is to raise the Canadian flour mill production to meet the British requirements.

DUCK MIGRATION LARGEST SINCE 1910

WASHINGTON—The biggest southward flight of ducks and other migratory waterfowl since 1910 has begun, Dr. W. N. Garfield, director of the United States Fish and Wildlife Service, reported last week. He has just returned from Alaska where he saw the ducks.

He told Interior Secretary Harold I. Ide that the flight might consist of as many as 150,000,000 birds and probably will reach its peak in October.

SCT. C.W. GIBBS IS MISSING

Mrs. M.J. Gibbs of Swallow has received word her second son, Sgt. Cyril William (Scotty) Gibbs, has been missing since after air operations overseas September 4.

Sgt. Gibbs enlisted with the R.C.A.F. in December 1940. He went overseas in February 1941 and has been on operations since then.

Four brothers are also in the armed forces. Gunner E.T. Gibbs is overseas, a Leading Steward Fred Gibbs is on convoy duty, LAC R.G. Gibbs is with the Air Force at Lachine, Quebec, and Pte. J.W. Gibbs at Camp Borden.

Sgt. Gibbs is 25 years of age.

FOR
Victory

VOLUME 22; NUMBER 35

CARBON, ALBERTA, THURSDAY, SEPTEMBER 30, 1943

\$2.00 A YEAR; 5c A COPY

PRICE OF WHEAT HAS BEEN RAISED FROM 90c TO \$1.25 A BU.

Will Make Payment on Participation Certificates

Of prime interest to farmers in the west and this district in particular where wheat is the main crop, was the announcement from Ottawa Monday that the price of wheat would be raised immediately to \$1.25 per bushel basis No. 1 Northern at Fort William. The price paid during the last crop year was 90 cents a bushel, and the increase means an additional cash income per bushel of 35 cents.

The trading of wheat on the Winnipeg Grain Exchange was suspended when the above announcement was made.

The Wheat Board also announced that a payment would be made to farmers on participation certificates held by growers who delivered wheat to the board in the years since 1940.

Following the discontinuance of wheat trading Monday, the Wheat Board announced the closing price of September 27, all stocks of cash wheat.

The initial payment of \$1.25 a bushel means a major increase in the return to western wheat producers.

HARVESTING 80% DONE

Harvesting in the district is still proceeding under ideal conditions and it is estimated that about 80 percent of the threshing has been completed. Many farmers have had their crops all threshed for over a week now, and others are just starting.

Wheat yields on the average are good and coarse grains are yielding well, and with the increase in price of all grains general conditions will be improved throughout the country.

WORLD WIDE COMMUNION ON SUNDAY, OCTOBER 3

In these days of war, when there is so much dividing men and nations, Christians must maintain an unbroken and brotherly fellowship.

On October 3, World Wide Communion Sunday, followers of Christ everywhere, in army camps and naval bases, on shipboard, in churches large and small, in the homeland and overseas will bear witness to this fellowship. The world-wide observance of the Lord's Supper will show frontiers of race, brook through barriers of prejudice and rise above the clash of nations. In obedience to Him who said, "This do in remembrance of Me," all who love Christ are called to gather about the Lord's table next Sunday morning in Carbon United Church and recommit themselves to the unfinished task of His Eternal Kingdom.

Killed together on an operational flight overseas were Sgt. Pilot Frank Harvey Barker (left), and Sgt. Air Gunner William Douglas Cameron (right). Both were Carbon boys and details of the missing flyers appeared in the last issue. A well attended memorial service for the two boys was held at the Carbon United Church on Sunday morning, September 26.

BEISER LAD FALLS INTO WHEAT AND SUFFOCATES

Donnie Parker, 13-year-old son of Mr. and Mrs. W. Parker of Beiser, was suffocated last Saturday afternoon when he sank over his head into wheat which he was shovelling.

The boy was working in an annex to a wheat elevator at the time. His father is principal of the Beiser school.

A WEEKLY EDITOR LOOKS AT Ottawa

Written weekly
for the weekly newspapers of Canada
By JIM GREENBLAT

This column which goes out to far and near, has been a long time in the making. It is not overemphasizing the appeal to the "small inventor" to think of the contribution he or she is going to, or should make, to the forthcoming Fifth Victory Loan. Everywhere, in all the towns and villages, they tell me at headquarters here, great preparations are being made by local committees to top local objectives. You know the fellows—your banker, your lawyer, your merchant, your school teacher, your farm community leader, your ordinary guy working beside the counter, will be appealing to you to "Speed Victory". The hundreds of releases which go through this office from army, navy and slanders, telling in piecemeal of the epic deeds, the sacrifices of your boys over there impels me to keep this subject "hot" before you and to try and convey the idea of the tremendous urgency of sending your spare dollars to strengthen muscles of our war effort.

Our production Canada will be a fundamental of any post-war economic, national and international. The local miner, the farmer, the fruit grower, have a job ahead. This was pointed out in Ottawa in speeches by the Prime Minister, by a distinguished visitor, William F. Raborn, M.P., parliament secretary to the British Ministry of Food, Lord Woolton. He emphasized that our task to produce foodstuffs will be one of the greatest in history, because Europe right now is in a "state of nutritional exhaustion". He was sure our post war problem would not be surpluses, but maybe shortages in such things as we produce in this country: meats, dairy products, fats and oils. Another interesting point he made—and I must tell these facts to space—that out of every \$10 worth of food bought in Britain, 92.50 is controlled. Price stabilization is fundamental to the British system of food control.

Items you may have missed: Total of all grain marketed during 1942-43 crop year was 486,823,292 bushels, an increase of 192,968,720 over the previous crop year. Christmas tree supply will be short owing to transportation and manpower exigencies. Even the type of twice used for kindling them is in short supply. Many jobs will have to be improved as in other things. . . Don't start construction of a dwelling or other project without a license, warns Minister Howe. Because of the scarcity of materials, a policy of drastic curtailment is now in effect. . . Present personnel of the Canadian Navy include 3,700 Wrens, is less than 70,000 officers and men; it was less than 2,000 when war began. . . A full blooded Mexican Indian, Carlos Godo of Digby County, was working on the new Tribal destroyer "Mimosa" as a rivet buster. . . The boat was launched Sept. 18 at Halifax. . . Besides politicians Ottawa is beginning to be famous for former world boxing champions; the second to appear here is now Mike McClellan at referee is Jack Sharkey.

Anxious an urgent appeal nearly 60 Ottawa women, including some grandmothers registered here one night in the registration of half-day help for the Civil Service.

The R.C.A.F. has expanded from

LONG YEARS AGO

September 29, 1932

Norman Ramsay has returned from British Columbia, where he spent the past year, and says that times are hard out there. General wages are 25 cents a day, and about 100 men here this fall are from \$2 to \$3 a day.

Carl Moorhouse has purchased a new Chevrolet truck to use on his cartage line between Carbon and Calgary.

Wheat yields are running high, and many fields are going over the 60 bushel to the acre mark.

"Micky" O'Brien, a farm hand, caused considerable excitement in town last Friday evening. Under the influence of liquor he drew a knife and slashed Const. Moriarty on the leg, cutting through his heavy boot and inflicting a severe gash.

Emil Zanni, 35, who has been hauling wheat for Jim O'Rourke, was seriously injured last week near Sharnbrook when he was thrown from a truck load of grain. The truck passed over his, crushing his legs and pelvis.

The school fair was held in Carbon Friday, and exhibits were not nearly as numerous as in previous years.

Buy More War Savings Certificate 1

a personnel of 4,000 before the war to 200,000 now.

One of the greatest of all discoveries in bacteria killing drugs, penicillin, a miracle for war wounds, and which will also be invaluable in peace time, is to be produced in Toronto and Montreal in Dominion government financed plants, employing 250 men and women. The initial contract is for 26 million units largest single order for medical supplies placed by Munitions department. The plants will be in operation by February.

By mid-April a weekly average production of 160 million units is expected. Penicillin has been in use since prior to multi drugs. It is produced through growth of a mould, similar to that you find on cheese. When you hear of billions of units, don't think there will be enough right away to serve all humanity. I am told that in difficult cases it takes between two and three million units of penicillin, so figure it out that way.

Interesting note to farmers: A ton of timothy hay contains about 18 lb. of nitrogen, 6 1/2 pounds of phosphoric acid, and 20 pounds of potash. This is rather more than would be returned to the land by a ton of ordinary green farmyard manure. If no fertilizers were applied, continuous crops of timothy would rapidly deplete the soil, the same is true in a general way of other grasses, the Department of Agriculture states.

Where does the national coffee get its Bitter? Part of it is from exotic and income tax. During the month of August just past, for instance, the "bake" was \$201,615,000 as compared with \$160,392,337 in the same month last year, which is about a 20 percent increase. Of this amount income tax alone accounted for \$121,490,570 and this is an "up" of over 25 millions.

Killed together on an operational flight overseas were Sgt. Pilot Frank Harvey Barker (left), and Sgt. Air Gunner William Douglas Cameron (right). Both were Carbon boys and details of the missing flyers appeared in the last issue. A well attended memorial service for the two boys was held at the Carbon United Church on Sunday morning, September 26.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

POSSIBLE DAMAGE TO GRAIN

Dr. B.N. Smallman, who is Canada's leading expert on the damage to grain caused by the greatly feared beet and other insects, has issued some suggestions to farmers on how best to protect grain which will still put into use on their farms. Dr. Smallman's valuable suggestions are worthy of the most careful attention. Here they are:

1. Repair leaky roofs to exclude rain and snow.
2. Have air space underneath the floor of each bin.
3. If the bin has a concrete floor spread a layer of moisture-proof paper on it.
4. Clean granaries thoroughly before filling.
5. Brush the walls and sweep the floors with damp sawdust.
6. Sprinkle a little hydrated lime over the floor and sweep it with the broom to the cracks with the broom.
7. If the granary had insects last year cover the inside of the bin with whitewash containing one quarter of a pound of pyrethrum of solution and let it dry thoroughly before filling with grain.
8. Allow an air space on the top of wheat.
9. If grain is stored on the ground place it three or four feet of straw on the floor and cover the top of the bins, and remove them, but remove these next spring.

A tin can is only 2 per cent tin; it is really made of tinplate, which is sheet steel that has been given a thin coating of tin on both sides to prevent rusting. When the can is collected as salvage, the coating of tin can be removed at a declining rate, and the steel then goes to a steel-works for melting down. The tons are, however, often sent direct to furnaces which boil them for a time in a temperature rising above 1,600 degrees Centigrade.

The Fifth Victory Loan

CANADA'S FIFTH VICTORY LOAN has an objective of \$1,000,000. This is the minimum cash objective, but it is anticipated that like the four previous loan objectives, it will be greatly over-subscribed. The sum which is asked from individual subscribers is \$25,000,000, while the remainder will be solicited from a special list composed of large business firms and corporations. This is the largest objective yet set for a Victory Loan drive and it exceeds the last one, held last spring, by \$100,000,000. It will mean, as it did in the four previous loans, that a maximum effort will be put forth by each individual, if the loan is to be a success, as it is sure to be. Canada's armed forces have increased steadily in numbers and strength, and to maintain them there must be full financial support from the people at home.

Severe Struggle Is Still Ahead

Finance Minister Tuley in announcing the Victory Loan campaign, warned the people of the Dominion against complacency, because of recent Allied victories. In this connection, he said: "Although recent war news has been extremely favorable, I am sure that Canadians know that a severe and costly struggle is ahead. Our fighting forces are at full grips with the enemy and I am confident that Canadians at home will find their full support by the purchase of Canada's Fifth Victory Loan bonds." Canadian troops in action have shown themselves to be of the highest calibre and they have received unreserved praise from all sides. Much of their success is due to their splendid training and equipment, all of which depends finally on the people on the home front.

Canada Praised By Churchill

In his recent historic radio address from Quebec City, Prime Minister Churchill, in addition to some words on Canada's contribution to the war, and gave some facts and figures which may have surprised some of us who were not fully aware of what is being done here. In relation to the size of her population, Canada's war effort is amazing, and to reach the proportions it has, whole-hearted financial support has been necessary. This has been supplied by the people of Canada, chiefly through increased taxation and the Victory Loans. We now have a further opportunity to show to ourselves and to the world, that this Dominion is prepared to support to the limit the mighty effort which is now being made to restore peace and order throughout the world.

HEALTH LEAGUE OF CANADA

You may use the dessert course to include some of the protective foods especially milk, fruit, eggs and whole grain cereals. These are important sources of minerals, vitamins and flavor as well as energy. If your main part of the meal is light such as soup, salad or sandwich, then you should serve a substantial dessert. This group includes butter puddings with sauce, pastry cream cakes, and cakes with rich fruit fillings. You can use this basic recipe for biscuit dough.

2 cups flour 1 tsp. salt 4 tbsp. fat 4 tsp. baking powder 1/2 tsp. salt or milk or water

Mix sifted ingredients. Cut in fat. Add liquid gradually to make a soft dough. Knead 30 seconds on floured board and pat to 1/2" thickness. You may use whole wheat flour or 1/2 graham and 1/2 white flour. To make a fruit whole pie roll the above with egg or preserved fruit, mince meat and roll up. Bake in moderate oven. You may also use this recipe for fresh fruit short cake by baking the biscuits first then adding the fruit.

Next you have the medium desserts, which include cheese and crackers, cornstarch, tapioca, sugar and rice puddings, simple frozen desserts, simple fruit puddings. These desserts may include butters or sugar meats. When you use cornstarch, flour or cocoa you must be sure the individual particles are separated from each other before heat is applied otherwise the thickened sauce will be lumpy. A basic recipe for cornstarch pudding includes:

1 1/2 cups milk 1/2 tsp. salt 1 cup sugar 1/2 tsp. vanilla

Mix cornstarch, salt and sugar. Add 1/2 cup of cold milk and mix thoroughly. Scald rest of milk. Add this to cornstarch mixture carefully. Cook in double boiler 15 minutes or longer until the mixture is of a runny starch, stirring constantly until thick and smooth. Add flavoring, turn into molds and chill. You may add the flavoring by adding fruit, caramel, maple or chocolate syrup, almond or lemon extract.

You should serve light desserts such as custard, junket, fruit, water ices or gelatin after a heavy meal. The above are all simple and easy to divide into two groups, soft and baked custards. You will find the difference in the consistency, which depends on the proportion of egg to liquid and the method of cooking. I will give you a basic recipe for custard to which you may add chocolate, caramel, fruit or coffee to alter the flavoring.

2 cups milk 1/2 tsp. salt 1 cup sugar 1/2 tsp. vanilla

Beat eggs, add sugar and stir until blended. Add hot milk and strain. Cook in a double boiler stirring until the mixture coats the spoon. Cool, add flavoring.

Baked Custard

The same ingredients would be used but if the custard is to be turned into a mold cut the milk down to 1 1/2 cups.

SERVICE CHEVRONS

Each black service chevron on a soldier's sleeve means a complete year of service in the present war. A silver "stripe" below them means that the officer or soldier is appointed or enlisted before September 10, 1940.

"City of a thousand steeples," Montreal, Quebec, is also famous for its towering St. Joseph's Shrine, situated on the slopes of Mount Royal.

Improve Your Health by Correcting Sluggish KIDNEYS

This way is Swift, Economical. Few conditions can harm your health faster than diseased kidneys and inflamed bladder. Your back aches, your head throbs, your eyes are miserable. You have restless nights. You suffer from constipation and indigestion. When these things happen your kidneys need help in filtering out the poisons from your blood. Give them the help—give them the GOLD MEDAL HAMMILL OIL CAPSULE. Accurately measured, this original and genuine Hammill Oil Capsule. You will be amazed to find out the way they relieve diseased kidneys and irritated bladder. Go to your drug store now and get a 40c box. Be sure you ask for GOLD MEDAL HAMMILL OIL CAPSULE.

THE CHRONICLE, CARBON, ALTA

Roll your owners! go for Ogden's

Old-timers relied on their tobacco in a smoky watered rough. And they relied on Ogden's in good times and bad. . . follow your example, Roll-your-owners with Ogden's. You'll find this famous brand is famous because it's a distinctive blend of rich, ripe tobacco worthy of its famous name. Buy a package today. Ogden's quality for pipe smokers, too, in Ogden's Cut King.

SMILE AWHILE

Mrs. Grimm—So you have a job with my friend, Mrs. Long. Did you tell her that you had only been with me two weeks?

Maid—Yes, ma'am, and she said if I could stay two weeks with you that was reference enough for her.

Lady—That parrot I bought here swears frightfully.

Dealer—I don't deny, madam, that he uses violent language. But you must admit he doesn't drink or smoke.

Host—Talking about Africa makes me think of the time—

Bored Guest—Good gracious, you're quite right! I had no idea it was so late. Goodbye.

Judge (questioning elderly woman who saw the verdict): "That's true that the plaintiff made only a cursory examination of his damaged car?"

Woman: "Good gracious, yes, but was he curious I had to put my hands over my ears."

A writer on the pastime says it is not known who invented the game of golf. One theory is that it was a Scottish woman who objected to her husband drinking at home.

Little Mary had been for a walk in the country. When she arrived home, her mother asked her if she had enjoyed her walk. She answered: "Oh, yes, Mummy, I had a lovely walk, but isn't funny what a lot of cottages are called 'No Keys'?"

"What's that building?" asked the stranger.

"That's the asylum for the blind," said the native.

"Go on, you can't fool me," said the stranger. "What's all them windows for?"

"You've made a mistake in your paper," said the indignant man, entering the editorial sanctum. "I was one of the competitors at the athletic match yesterday, and you have called me the well-known lightweight champion."

"Well, aren't you?" said the editor.

"No, I'm nothing of the kind, and it's awfully awkward, because you see, I'm a coal merchant."

Teacher—John, who were the Pilgrim Fathers?

John—Darned if I know! I always got those religious orders bailed up.

"Do you have matins at this church," asked the visitor.

"We used to have," replied the vicar, "but the new vicar tripped over them, so 'e put down a carpet."

HOW TO PREVENT MANY COLDS

From Developing Quick—Put a Few Drops of Vicks Vapo-Rol in your nose at the first sniff, sneeze, or sign of catching cold. It will keep the infection out of your nose and throat.

VICKS VAPOROL

Our Boys And Girls On Active Service

(By Ottawa Observer)

It's a different war the navy boys find. Before going ashore to keep date nowadays a fellow has to get the approval of the officer of the day. He has to be clean shaven, he must be shined, faced shaved, hair groomed, and if you don't believe us ask Stoker Benny Bennett of Timmins, Ont. He was ready to hop into port somewhere, and after the officer checked him over, he had to scurry around and find a barber first.

Something new has been added. A number of CWACs are to get a course of instruction in Violent Training and Training at McGill University. Some from every Military district and some from basic training centres.

Flight Sergeant Jack Hughes, a former tact driver of Dauphin, Man., will always remember his last flight in Sicily before being off to England. The R.C.A.F. man was over his target when a wing of his plane was blown off by ack-ack, and he went into a deadly "roll." How he did it no one knows, because he should have been a "gone guy" long before he did it. He didn't bring the one armed ship into a landing at all. He was in the air at 210 miles an hour. He's now back in England after thumping his nose at the old man with the scythe.

One of Canada's newest fighting ships has a mascot named "Snippy," a little white cat. The ship is a pint-sized gun terrier, and he governs the crew just like a commanding officer.

Leading Airwoman Pat Joslin of Kitchener, Ont., was passing through London, Eng., to her bomber group of the R.C.A.F. with a cousin, Lt. Mary Barr of Simcoe, Ont. Sitting on a pile of luggage, she met her brother, Lieut. Ross Joslin, whom she hadn't seen for three years. She dashed wildly into the crowd, but imagined her brother was away in the underground (tunnel) before she got to him. "Tough luck that."

Among the many decorated Canadians recently awarded Canadian Orders of Merit, were Distinguished Flying Medals to Flight Sergeant H. E. Patch of Vancouver, B.C., and Flight Sergeant A. P. Paat of Langley, B.C.

Soon to be sub-lieutenants in the Royal Canadian Naval Volunteer Reserve are Albert and Pearl Porter of Reawtown, Sask. Navy cadets Ottawa never cease making a name for themselves. They are velling at the fact that boys from the prairie make such good sailors. Fellows who have had very little, if any, chance to get their sea legs. As a matter of fact, the boys had never been on a boat before they were sent to sea. They are "sea" sailors, too, specifically the "Wrens" of the Navy. They are a fast ship, and off fast enough at an English port, were Wrens from the Navy, the Manitoba, who used to be a stenographer, and Dorothy Hill of Meadow Lake, Sask. They are a fast ship, and off fast enough at an English port, were Wrens from the Navy, the Manitoba, who used to be a stenographer, and Dorothy Hill of Meadow Lake, Sask. They are a fast ship, and off fast enough at an English port, were Wrens from the Navy, the Manitoba, who used to be a stenographer, and Dorothy Hill of Meadow Lake, Sask.

Keep writing the boys and girls from the front. That's the best present you can send them, although they do love the cigs, candy and stuff. In distress times can also help with morale. One firm we know of which sends out their weekly on the doings around the shops. Why they get more kick out of that than the newspaper headlines.

Many of you will want to know what this "link training plan" for the army is. Now that all army basic training centres in Canada are being reorganized to release the maximum efficiency, retraining of the army's B.T. at a centre designed for their particular training. Instead of to a general centre of the army, B.T. centres will be specifically associated with or "linked" to the advanced training centre. This service concerned. Hence the name "link" training. It will mean reinforcement units in future. Men not of combat status and who will be discharged from the army.

Empire Study

Britain To Supply Special Courses In School On Empire Affairs

British school-children are to learn more about the Empire. More than 100 teachers from state schools are spending their holidays in York, where they are attending a special course on Empire affairs. The Board of Education plans to hold these schools on the Empire's teachers in all parts of the United Kingdom, so that they will be able to pass on to their pupils a more vital outlook on the Empire's affairs. The course is being held at the York School of Education, where Mr. L. B. Amery, Secretary of State for India, who opened the course with a talk on India.

I STOPPED "DOSING" MY CONSTIPATION AND CORRECTED THE CAUSE!

It is these busy days of war you owe it to your country—as well as to your self—to keep "in the pink." That's why it's so important to avoid the common type of constipation caused by lack of "bulk" in the diet. And do it by getting right at the cause instead of "dosing" with harsh purgatives that give only temporary relief. Just follow this simple plan. Eat

RELLYON'S ALL-BRAN every day! It's delicious as a cereal or hot, tasty muffins. Drink plenty of water. These three things will give you the "better way" to natural regularity. But remember, eat ALL-BRAN every day!

Doctors have ALL-BRAN in two convenient sizes. Made in Kellogg's in London, Canada.

Sisters Receive Their Commissions

Miss Bernice (left) and Miss Ruby (right), daughters of Mr. and Mrs. S. G. Soper of Arcola, Sask.

Working their way up through the ranks of the Canadian Women's Army Corps, the above sisters recently received their commissions.

Miss Bernice Soper, among the first girls to volunteer for service in Sept. 1941, and having served in all ranks, received her commission in March, 1943. This was followed immediately by the cadet course, and she received her commission on June 3, 1943, at the first graduation ceremony held at the Basic Training Centre, Kitchener, Ont., since the training centre opened, and returned to that centre on August 14th, after spending her summer leave at Carleton Place, Ont., and her parents, Mr. and Mrs. S. G. Soper of Arcola, Sask.

Miss Ruby Soper, who enlisted in May, 1942, and was recruited in the M.C.O. course in March, 1943, was followed immediately by the cadet course, and she received her commission on June 3, 1943, at the first graduation ceremony held at the Basic Training Centre, Kitchener, Ont., since the training centre opened, and returned to that centre on August 14th, after spending her summer leave at Carleton Place, Ont., and her parents, Mr. and Mrs. S. G. Soper of Arcola, Sask.

Both girls are now serving in the ranks of the Canadian Women's Army Corps, the above sisters recently received their commissions.

Canada Should Now Be Able To Provide Opportunities For All In The Post-War Period

IN the lucky, aggressive, industrialized Canada of today it is sometimes difficult to recognize the Canada of only a few years ago with its limitations, its questioning, its self-deprecation, and its discouragement. In these four years of war we in Canada have proved ourselves to ourselves. We have seen that, when the incentive is great enough, great achievement is possible to us.

Perhaps we understand it, as we didn't before, because of the tangible evidence before us. Every little town has taken on the hurry and bustle of urgent occupations. The bare fields about a multitude of cities and towns have mushroomed into immense industries, with minor cities of their own to serve them.

We who have seen these things happen sometimes stand a little uncertain before our own accomplishments, wondering why it took us so long to make all this possible. What will happen after the war? What opportunities will be offered the returning men, men who are entitled to the best we can give? Is it enough to offer them rehabilitation grants, nothing allowances, medical treatment, and unemployment insurance? Is it enough to talk of pensions and vocational training and out-of-work benefits? These are all well enough in their way, but they are in the careful, timid spirit of the older Canada, the Canada that is sure of itself or its future. They are all negative things, protections against misfortune. We don't want to be in terms of misfortune, of making jobs to keep men in busy futility. We want men to work in the same spirit and for the same Canada for which they were ready to fight.

Perhaps the best principle the government can follow is to give to the men who served Canada who have had the opportunity to serve her in peace. We may not like the words capitalism and management, but we are ready to accept something worse, we had better turn over the job of post-war reconstruction to the men who know how; and then, it need be said that they serve us well.

The business man is already planning for the days to come, with his eye on the crying needs of the home market and the great new world market that is now facing Canada. Only the other day a business executive told the writer that his company had five new products ready to be placed on the market as soon as certain raw materials were made available. It was not a casual statement. Every item in the production and sale of these new commodities—costs, production problems, distribution, down to the very fact of the advertising copy that will introduce it—has been finally considered and passed. There is now only the waiting for the moment to begin.

It is probable that in the offices of most progressive businesses there is a secret file marked "Post-war Plans." Here is the beginning of the same sort of forward looking that in these grim days has given Canada an assured position in the world. It is a great thing to assure freedom from want, at least, to the men who have served us well. It is a better thing to learn to work together so that Canada may be among the leaders on the way to that new world where all the freedoms are assured.—From The Liberty Magazine.

Joining In Fight

Believe There Are Many Greeks In The Armed Forces Here

It is estimated there are today hundreds of Greeks in the Canadian armed forces and from time to time more are joining in the fight for the "United Nations" cause.

The latest of this brave race of people enlisted in the Canadian Women's Army Corps at Winnipeg, is Miss Jean Demas of Winnipeg, daughter of Mr. and Mrs. C. R. Demas of Maple Creek, Sask.

MOST IMPORTANT

The information clerk at the North station in Boston, thought he had heard about everything until a soft female voice asked on the telephone, "Can you tell me whether the air-conditioned cars on the Kennebec Limited tomorrow morning will have blue or brown upholstery?" The woman explained: "You see, I could tell you purple since that has brown upholstery."

ORIGINATED IN EUROPE

The verse about the lady flying away home to save her children from burning originated in Europe, to go home and save her children, who could not fly and their children were burned after harvest.

To Help Others

Girl Who Lost Plane Buys Dinghy With Trousseau Money

An airman will live some day because a trousseau became a dinghy in one of the countless tragedies of war.

The story begins with young Jimmy Newman sending out short-wave messages from his home, 45 6th street, New Toronto, before the war. He used to pick up Reginald Auckland of Hornsey, England, and Reginald would tell him about his sailor, Ellen.

Well, war came along and Jimmy enlisted and became a bomber pilot and went overseas. He looked up the Auckland and fell in love with this same Ellen.

Two days after their engagement, Sgt. James Newman, 22, R.C.A.F., was reported missing after 16 operational trips in Wellingtons and Stirlings.

Ellen hoped and prayed. The money she was saving for a trousseau piled up and up and she didn't give up her faith as week followed week.

But finally, after months of hope the casualty lists carried Jimmy's name in connection being "Missing—Believed Killed."

The day Ellen and young Jimmy were to be married, Ellen was taken into R.C.A.F. headquarters in London and left the money she had saved for a wedding dress. She said she wanted it to buy something that might save the life of another airman.

So Ellen had the pleasure of presenting to the R.C.A.F. a rubber dinghy of the type that has already saved scores of pilots and gunners and navigators.

It was received by P.O. Pat Finerty, D.F.M., of Kingston, who dies with Jimmy's squadron.

THEIR OWN BUSINESS

An American correspondent claims to have discovered deep in Africa some Englishmen who still dress for dinner. Well, if they wish to add a stiff shirt front to a stiff upper lip, who shall criticize? They have surely earned the right to dress and dine as they please.—Editorial Journal.

(Passed by Censor)

When word was first flashed throughout the world that Right Honourable Winston Churchill, Prime Minister of Great Britain, was in Quebec, there was much speculation throughout the country as to how he had reached Canada's Ancient Capital.

One of the first Canadian newspapers to reach Quebec, but the words "Secret and Confidential" at the end of the transportation advice meant just that to them. The fact that there were no leaks and that the many special trains staffed with the three great leaders of the Allied nations, their numerous advisers and officials and members of their staffs, were operated without a hitch is a tribute to the Canadian railwaymen. One of the first Canadian to greet Mr. Churchill was Mr. J. C. Vaughan, Chairman

Built For Britain

The H.M.S. Flitway, named for a British war hero and built for Britain under lend-lease, slips down the ways at the Bethlehem-Hingham shipyard, Boston, Mass., just eight and one-half days, 204 hours after her keel was laid. It is a national record for destroyer escort building.

Rings And Trinkets

Army Guards Have Souvenirs Given Them By German Prisoners

Rings and trinkets given them by German prisoners they helped guard were brought back to Canada last week by a group of 58 western soldiers returned from overseas.

The men were welcomed by a reception committee workers as they stepped off the train at Winnipeg.

One man showed Alderman Hilda Jesson a ring carved from a tooth brush handle. He said the prisoner had made it to while away the time. Other men had rings made from planes. One Canadian youth displayed a silver belt buckle given him by a Luftwaffe prisoner.

Private W. A. Trole, Royal Canadian Army Medical Corps, Winnipeg, said he operated 12 of these men prisoners on the way home. He asked the German what he thought of Hitler. Said the youth: "I don't think, but Mussolini, he has no brain."

THE "SECRET SPECIALS" OF THE QUEBEC CONFERENCE

man and President of the Canadian National Railways, which system operated 12 of these "Secret Specials," including the train which carried the British Prime Minister and the members of his immediate party to Quebec for the opening of the Conference, and the Presidential Special which carried Mr. Roosevelt and his staff from Quebec to Ottawa, and from the Canadian Capital to the United States. Other special trains operated by the Canadian System in connection with the Conference carried members of the cabinets of both Great Britain and the United States, high government officials,

New Drug Discovered

Professor Engaged In Research To Discover Value Of Clavacin

Prof. H. W. Anderson of the University of Illinois Department of Horticulture, discloses that he is engaged in research to determine the value of clavacin, another drug obtained from mold and said it "may prove to be more useful than penicillin for certain types of diseases."

He asserted that it kills all bacteria killed by penicillin and some that are unaffected by the latter drug, which has proved to be a medical sensation.

The university board of trustees also revealed that it has approved a \$75,000, three-year research project aimed at finding a method for synthetic production of penicillin.

The rare drug now is obtained from mold in small amounts by a tedious process. A grant of \$75,000 will be furnished by the Ughon Company of Kalamazoo, Mich., and chemists will try to take the drug apart and see if it can be manufactured synthetically with more speed.

Prof. Anderson said clavacin has proved successful in control of plant diseases, but that its toxic properties when injected into animals have not been determined.

It is possible that clavacin, like penicillin, can be used against bacterial infection in humans when more is learned about its properties," he said.

Choice Is Varied

Seemless Like All Magazines But Especially Those With Pictures

The choices of merchant seamen in the matter of reading matter is very diverse, according to a survey made in the League of Allied Seamen from British as well as Canadian seamen at the League's Seamen's Club at St. John, N.B. A wireless operator from Edinburgh, Scotland, told of the reading preferences on his ship. After the seamen had used up all the quizzes in the magazines, they made up their own quizzes from facts found in the magazines of the Navy League sent aboard and spent many an interesting evening at anchor in port by trying out their homemade contests on one another. He said it was not only the Canadian and American magazines that are appreciated but Canadian and American books also.

Ormand he suggested that picture magazines were the best possible gift, for pictures are a universal language and a boon to mixed crews. "They are, of course," he said, "and the Canadian and American women's magazines, chiefly because they can take them home later to their wives."

At Lord Woolton's suggestion, Britain's restaurants are planning to serve "meatless" or "veggies," also called "ship-saving meals."

Has Advantages

Forestry Authorities Think Helicopter Might Be Good Protection

Helicopter may serve as a peace-time instrument of protection over Canada's forests.

Brain-child of Igor Sikorsky, Russian plane inventor, designer and builder, the craft is able to soar straight off the ground without forward run and in flight it darts forward and sideways, even flies backward. It can "sit" motionless in the air, making vertical landings in areas no larger than the average back yard.

Opinion gathered in a Canadian Press article of provincial forestry authorities indicates these officials are watching development of the craft and, depending on the results of experimental trials, may incorporate it on forest protection service.

Ontario authorities plan to obtain one of the machines when available and put it to the test.

Its apparent advantages in forest work over the conventional types of plane now used are that it can hover at tree-top height or in the smallest clearing, and descend, fire-fighters early on the ground, or hang suspended above the forest crown while fire-fighters "convenient" trees and scramble to earth.

Its ability to move in all directions in a comparatively small space appears to be the answer to the needs of survey work. It could even make minute photography work "shooting" the "shooting" disease-spreading rat that high-speed planes might miss.

The mackerel shark rolls itself up in the ball when caught in a fisherman's net.

Winston Churchill's Advocacy Of An Anglo-American Alliance May Prove An Historic Event

THE cause of English-speaking union is not a new one; has long been enshrined in many hearts. It may be said that neither a year has had a mightier advocate or nobler advocate than the world heard when Winston Churchill spoke at Harvard. More, and more hopefully, it may be doubted whether at any time within living memory, or perhaps indeed within a century, the dream has been nearer to coming true.

Embroidery Looks Like Applique

By Alice Brooks

This applique effect is wonderful. Only say to do . . . and sure to find explanations of delight from your family and friends. It's just fast-going single stitch, lay-day-day-brothers complete the design. Pattern 7299 contains a transfer pattern of a 15 x 19½ inch motif and smaller motifs; stitches; list of materials.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winning Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to include plainly your Name, Address and Pattern Number. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

The Peace River area, around Hudson's Hope on the Alaska Highway, is rich in coal deposits of a superior quality. Goldwin Gregory of New York, said in an interview.

By ANNE ADAMS

Every one of the few simple lines in Anne Adams Pattern is cut with acute understanding of your own slim figure. Again full button front frock is a money to hug into a hurry. And 80 say to do up! Follow the clear instruction sheet for quick time in making it.

Pattern 4493 is available in junior sizes 10, 11, 12, 13, 14, 15, 16, 17 and 18. Size 18 takes 3 1/2 yards 20-inch fabric.

Send twenty cents (20c) in coins (change cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. Because of the slowness of the mail delivery of our patterns may take a few days longer than usual.

Speediest of swimmers, the sailfish can travel at a speed of 68 miles an hour.

Girls' Band

Pipes Imported From India Are Played By Lakshmi Devi Pipers
Back in 1929, when the Fort William Girls' Pipe Band was organized, the Canadian supply of bagpipes was so limited that arrangements had to be made to import pipes from India.

Today the Fort William Girls' Pipe Band is one of the busiest musical organizations in Canada, playing at least five engagements every week, most of them for the entertainment of members of the armed forces.

The band's early association with things Indian has continued to the present time, for the leopard skin worn by the bass drummer comes from a leopard shot in that country by a missionary friend of the band. He had the hide cured, and shipped it to Fort William this spring.

Concluding a working-tour which had taken them to M.D. 10 training centres at Brandon, Shilo Camp and Portage la Prairie, the girls appeared at the 10th Brigade Training Centre at Fort Garry, Winnipeg suburb, on September 2nd, and the Orpheum Theatre for down town troops on September 3rd.

Entirely self-sustaining, the band last summer toured the central United States with Grace Fiddle. Ages of the band members range from 13 to 19 years. In charge of the girl pipers are Mrs. P. MacGregor and Mrs. R. McGowan, both members of the band's auxiliary, and Mr. C. Dykes, band president.

Within Range Of Guns

New Treatment For Soldiers Good Cure For Nerve Shock

British soldiers suffering from "nerve" shock in Sicily were normally taken out of the line for a few days relaxation within range of enemy guns, according to London psychologists.

The practice, one explained, is a development of "an interesting principle originated in the last war." The aim is to give no time for the shock to set in.

"If you send a soldier suffering mental distress due to physical exhaustion for an extended convalescence," he continued, "he has time to brood and his cure may take far longer."

"But give him just a few days' rest in the battle zone and some drug such as luminal or veronal to relax taut nerves and you soon have him back to normal."

Scientists say Florida is the only peninsula in the world where the sea builds up the coasts on both sides.

Donkey Mascot For Canadian Army Unit

—Canadian Army Photo.

Wanted: a short phrase which would adequately describe this picture. The subject matter concerns a baby donkey which has been adopted as unit mascot by the Saskatoon Light Infantry in Sicily, and Pte. P. T. Leachman of Prince Albert, Sask., who is soldier in charge of feeding and watering. The Saskatoon Light Infantry was one of the Canadian Army units which fought so gallantly in the Sicilian campaign.

Speed Grain Shipments

Movement Of Wheat, Oats And Barley For Eastern Canada

In order to speed up the movement of wheat, oats and barley for feed for livestock in Eastern Canada, such grain containing up to one per cent. dockage may now be shipped direct from country points in Western Canada without stop off for cleaning at Fort William or Port Arthur, the Feeds Administrator has announced.

This concession, he said, is an emergency measure only and is intended to help relieve the bottleneck due to congested facilities at the lake head terminals. Such grain will be eligible for free freight and other subsidies which are now in effect.

SUNDAY SCHOOL LESSON

DEUTERONOMY 26

ABRIDGED VALUES FROM ISRAEL'S HISTORY

Golden text: Righteousness exalteth a nation; but sin is a reproach to any people. Proverbs 14:34.
Lesson: Deuteronomy, Chapters 1-3, Chapter 11.
Devotional Reading: Deuteronomy 10:12-22.

Explanations and Comments

An Appeal Based on God's Goodness, Deuteronomy 11:1-9. The first six verses of this chapter recount what God had done for the Israelites in saving them from the Egyptians, and then stop abruptly for, as verse seven declares, "that your eyes have seen all the great acts of the Lord which he did, and the most verse begins with 'Therefore.'"

Therefore, because of their experience of God's goodness to them, they must keep all his commandments. As the result of their keeping the commandments they will be strong, and can go in and possess the land.

The Promised Inheritance, Deuteronomy 11:10-12. It was a rich land that they were to possess, luxuriant in the produce of flowers, figs, pomegranates, and other fruits, and honey. It was not as the land of Egypt, where they sowed their seed and then had to water it with their foot. (This was done by raising the water from the Nile by means of papyrus whose broad leaves were weighted with the foot, or by diverting water into channels whose separating ridges were broken down, or whose sluices were opened, by the feet.)

The land to which they were going was watered by rain from heaven. The Israelites Could Hope to Prosper if They Served the Lord, Deuteronomy 11:13-17. If they loved and served God with all their heart and soul, they would be rewarded by the former and the latter rain, the two rainy seasons of Palestine, which would enable them to gather in their grain, their wine, and their oil. The "former rain" falls in late October or early November, when the seed is sown; the "latter rain" in March-April, before the harvest. Unlike Egypt the fertility of Canaan was not the reward of human labor and go in and possess the land.

The autumn rain the seed would not quicken and grow, and without the spring rain there would be no "full corn in the ear." Should they turn away and worship and serve other gods, Jehovah's anger would be against them, no rain would fall, and they would perish.

"Let us remember that there is no method of obtaining God's protection but adherence to his laws." (Gladstone).

The surface of the sun takes about 25 days to rotate.

Aid To Russia

Britain Sending Large Consignments Of Warm Clothing

The British Government's decision to allocate £2½ million toward the cost of providing clothing for Russia and the other half-million pounds being met by Mrs. Churchill's Red Cross Aid to Russia Fund—has resulted in the purchase of a large variety of goods, including heavy woolen cloth, sheepskin and fur coats, pull-overs, men's and women's suits, dresses and overcoats. Large consignments have already been sent out, and will be followed by others as shipping becomes available. This, when short age of such supplies in Great Britain necessitates such rationing that if a woman bought one pair of full-length stockings a month, and one dress and one pair of shoes a year, she would have no coupons left to buy other clothes!

American straw hat industry began in Massachusetts in 1804.

Locomotives For Russia

Britain Has Dispatched A Number For Use Of Army

Britain has dispatched a substantial number of her best locomotives to help the Russian Army, and has done fine engineering work in opening up transportation through Persia on the southern route to Russia.

As early as November 10th, 1941, the 1,000th freight car built by the Southern Railway Company in Great Britain to carry supplies to Russia through Persia was sent on its way. Working all day and night, men and women labored the work in ten weeks, with the co-operation of other railway companies which helped with materials. In peacetime, the same output would be scheduled for twelve-month work.

A new telescopic sight for rear gunners on fighter planes makes possible a wider arc of fire.

REG'LAR FELLERS—Prolific Idea Man

BY GENE BYRNES

HOLD HIGH THE TORCH OF FREEDOM

CANADIAN FARMERS
Save BY MAIL

Determined, systematic saving by every citizen is part of the national price of VICTORY.

Patriotism now demands not only the saving of money but many other things—gasoline and tires, for example. Use of the motor car must be limited to necessary tasks—necessary to the war effort. Many Canadian farmers find it unnecessary to drive to town to do their banking. They just walk to their own mail-box and bank.

Have you ever tried banking by mail? It is so easy and convenient. Write for our folder, "How to Bank by Mail".

When it comes to saving
coal—Patriotism and
common sense go
hand in hand

FARSIGHTED householders are seeing the urgent need of preparing their homes now against this winter's coal shortage. They are acting now!

HEATING SYSTEMS MUST BE
EFFICIENT: HOMES SHOULD BE
ADEQUATELY INSULATED.

Here are some jobs you should be doing NOW!

- 1 Have your entire heating system inspected. Order necessary repairs.
- 2 Have your furnace thoroughly cleaned by a competent man. Insulate furnace and pipes where necessary.
- 3 Be sure that you have sufficient storm windows and that all windows and doors fit tightly. Have cracks in walls repaired. Weatherstrip wherever it is necessary. Consider seriously the insulation of ceiling and walls.

Many homes waste as much as 60% of their fuel through inefficient heating equipment, inadequate insulation and other heat losses. Winter is just around the corner. Prepare NOW!

THE DEPARTMENT OF MUNITIONS AND SUPPLY

HON. C. D. HOWE, Minister

Snickerette

"Mummy," asked the inquisitive small boy, "what are all these air-raid shelters for?"

"If there's an air raid," mother explained, "then all the people can go down there and stay in safety till it's all over."

"But mummy," protested the little boy, "they'd miss all the fun."

•

Boss: "There's two dollars missing from my desk drawer and no one but you and I have the key to it."

Office boy: "Well, let's each put a dollar back and forget it."

•

"Perhaps you'd better fetch the manager, young woman," snapped the fussy customer. "No doubt he'll have more sense than you seem to possess."

"He certainly has, madam," came the quick reply. "He went out as you came in."

•

Two Irishmen arranged to fight a duel with pistols. One of them was very stout, and when he saw his lean adversary facing him he raised an objection.

"Dead!" he said, "I'm twice as big a target as he is, so I ought to stand twice as far away from him as he is from me."

"Be easy now," replied his second, "I'll soon put that right."

"Taking a piece of chalk from his pocket, he drew two lines down the stout man's coat, leaving a space between them."

"Now," he said, turning to the thin man, "fire away, ye spalpeen, and remember that any hits outside the chalk mark don't count."

•

The daughter of a certain strict-principled old deacon had attended a dance the previous night against her father's wishes. When she appeared for breakfast the next morning, he greeted her with the words:

"Good morning, daughter of Satan."

"To which the maiden respectfully replied: "Good morning, father."

•

A countryman heard that the job of watchman at a single-line railway crossing was vacant.

"You'll have to undergo a strict examination," the man in charge said when he applied for the job.

"Ask me anything," said the applicant.

"All right. Supposing you are at the crossing and two trains are coming along from opposite directions, what would you do?"

"I'd blow my whistle."

"Supposing your whistle was out of order?"

"I'd always wear a red shirt, and I'd take it off and flag the train."

"Let's say this happened at night."

"Then I'd swing my lantern."

"But suppose you had no oil in your lantern?"

"In that case I'd call my sister."

"Your sister? What for?"

"I'd just say to her, 'Come on down sis, and see the mightiest wreck you ever saw in all your life.'"

NEW SCHEDULE
PRESERVES RATIONING
EFFECTIVE SEPTEMBER 30, 1943

Preserves rationing gives the consumer a number of choices both of products and sizes of containers. Because of the wide range of container sizes and the variation in buying habits across the country it was necessary to put the system into operation and then make adjustments on the basis of experience.

Now that preserves rationing has been in effect for several weeks, it is possible to make some increases in coupon values. The new schedule is announced below and is effective September 30th.

The new doubled ration allowances for molasses, extracted and comb honey will enable consumers in areas where consumption of these products is heavy, to buy more and still leave enough for districts where the total demand is light.

The increased ration allowances for corn, cane and blended table syrups and maple syrup are adjusted to bring coupon values more closely into line with the great variety of container sizes now in use.

ONE "D" COUPON IS GOOD FOR

Not More Than

Jams, Jellies, Marmalades, Maple Butter,
Apple Butter or Honey Butter - - - 6 FLUID OZ.

Comb Honey (in Squares) - - - - One Standard Section

Cut Comb Honey - - - - - 1 LB. NET

Extracted Honey or Maple Syrup - - - 12 FLUID OZ.
(1 LB. NET)

Maple Sugar - - - - - ½ LB. NET

Molasses - - - - - 20 FLUID OZ.
(1 PINT)

Corn Syrup, Cane Syrup, or any Blended
Table Syrup - - - - - 14 FLUID OZ.

Canned Fruit - - - - - 10 FLUID OZ.

Sugar - - - - - ¾ LB. NET

Coupons D-4 and D-5

NOW BECOME VALID SEPTEMBER 30th

The validity date of these coupons has been moved forward from the original October 14th to September 30th.

This has been done to accommodate purchasers of some items which at this season of the year are normally bought in large units.

Coupons D-6 and D-7 will become valid on November 11th and the original schedule will be continued from then on, with two coupons becoming valid every four weeks.

More Ships Are Available For A Second Front

LONDON.—Naval success in the Mediterranean appeared to have put the Allies in a position to realize by November their goal of 10,000 tons of shipping to support a second front in Europe.

Turning the Mediterranean into an Anglo-American lake also had a subsidiary effect—the possible immediate release of a half dozen capital ships and accompanying cruisers, carriers, destroyers and other vessels for the Pacific.

It was estimated unofficially that the Allies need at least 10,000 tons in the shipping pool for establishing and keeping a second front in western Europe.

Based on published construction and loss statement, the Allies probably gained about 3,500,000 net tons of losses since May 1 through the building program alone.

Another estimated 3,000,000 tons was made available through the closing of the Mediterranean shipping route, eliminating longer hauls to Ceylon and India.

Based on published construction and loss statement, the Allies probably gained about 3,500,000 net tons of losses since May 1 through the building program alone.

Another estimated 3,000,000 tons was made available through the closing of the Mediterranean shipping route, eliminating longer hauls to Ceylon and India.

Based on published construction and loss statement, the Allies probably gained about 3,500,000 net tons of losses since May 1 through the building program alone.

MEN NEEDED

Enlistment For General Service Is Still Very Necessary
OTTAWA.—The Canadian army needs men and will continue to need them right up until the war ends. The Canadian Press has been informed on high authority.

Any conclusions drawn from the announcement of a reduction in the home operational establishment of the army to the effect that fewer men may be called up for military service in future or that fit men may be discharged from the forces are unfounded to be without foundation.

In announcing disbandment of the 14th and 8th partial disbandment of the 6th divisions, Defence Minister Tilden said:

"It must be emphasized that the fact that there is to be a reduction in requirements for operational troops in Canada does not mean that the demand is reduced for overseas."

And later in the statement:

"The consequence is that there must be no let-up in the enlistment of men for general service. The flow into the reinforcement stream must be steadily maintained to provide as planned for present and future action."

Based on published construction and loss statement, the Allies probably gained about 3,500,000 net tons of losses since May 1 through the building program alone.

Another estimated 3,000,000 tons was made available through the closing of the Mediterranean shipping route, eliminating longer hauls to Ceylon and India.

Italian People Are Reported To Be Starving

WITH THE CANADIANS IN THE CENTRAL MEDITERRANEAN.—The Eighth Army invasion of the Italian mainland confirms previous reports that the people of Italy are definitely hungry.

During the course of the campaign in Sicily the near-starvation conditions under which 3,500,000 Sicilians lived astonished Anglo-American-Canadian liberation forces. Reports from the southern mainland, where the Eighth Army, including Canadians, are now in control, show that things are not much different here.

Normally Sicily exports its wheat surplus to the Italian mainland, but this season there was not enough for Sicily itself, let alone the rest of Italy. Long tragic breadlines have been in evidence in all liberated cities.

The allied occupational government is trying hard to aid people whom two decades of Fascism would not feed.

Your reporter has seen children at the family table making a complete meal of the kernel of hard wheat. Grapes are plentiful in the rural regions, which is a welcome addition to the very low diet of the people.

It is a pathetic sight to see old men trying to sell souvenirs to scrape up a bit of money to buy some food. Corkerew, brushed-up family spoons, posters, cameras, watches and numerous trinkets are the items they generally try to pass off on allied soldiers. Mussolini's Fascism never did properly feed these people and food is still their major lack to day.

AMG announced that steps were being taken to overhaul Sicily's price decrees and rationing system to combat the black market while plans for industrial and commercial rehabilitation are being made.

Based on published construction and loss statement, the Allies probably gained about 3,500,000 net tons of losses since May 1 through the building program alone.

Another estimated 3,000,000 tons was made available through the closing of the Mediterranean shipping route, eliminating longer hauls to Ceylon and India.

EDUCATION OF YOUTH

Suggest Setting Up Of Advisory Council On School Broadcasting
QUEBEC.—Education should become the key to post-war reconstruction. Dr. J. B. Thomson, general manager of the Canadian Broadcasting Corporation, said here in an address to the Canada and Newfoundland Education Association convention.

"As I understand it, the basic principle of the proposals for reconstruction rest upon the conviction that the real wealth of a nation is its people," he continued. "Surely the best method of conserving and developing this most valuable of our resources is the education of youth."

"This will involve the expenditure of money, but in a democratic society the final control and direction of public spending is a reflection of what the people count as valuable."

C. R. Lambert, educational adviser of the Canadian Broadcasting Corporation, asked the approval of the convention of a plan for setting up of a national advisory council on school broadcasting.

The council, he said, would consist of 14 members: one for each province except Quebec (which would have two—one French and one English), one for the Confederation of Canadian Teachers' Federation, and one for the National Federation of Parents' Association.

In addition, the CBC would nominate a distinguished educationist as chairman.

After discussion, the suggestion was approved by the delegates, with the amendment that the number be raised to 16, to include a French-speaking representative of the union bugle and a second representing the Parents' Association.

"There is no need to elaborate on the future importance of school broadcasting in Canada," Mr. Lambert said. "Radio is admirably suited to be the instrument for strengthening national unity in the rising generation in our country. It is up to experts to prepare the plans—experts in education and experts in broadcasting."

Based on published construction and loss statement, the Allies probably gained about 3,500,000 net tons of losses since May 1 through the building program alone.

Another estimated 3,000,000 tons was made available through the closing of the Mediterranean shipping route, eliminating longer hauls to Ceylon and India.

When Poverty Is Defeated World Will Progress

LONDON.—Field Marshal Viscount Wavell, viceroy-designate of India, told the Pilgrims Society that "we shall really be making progress when we are willing to spend money against poverty, ignorance, unemployment and sickness at the same rate as against Hitler—when we pay our schoolmasters at much higher rate and our lawyers perhaps at a somewhat lower rate."

Advocating a return to the Pilgrim spirit, he called for the "first attempt on a large scale for many years to put principles and new lives first and money second."

The viceroy-designate told the Anglo-American luncheon audience that the establishment of Viceroy Lord Louis Mountbatten's East Asia command would make Anglo-American co-operation even closer in India, which is one of the principal bases for our common effort against Japan.

"There can be no military or economic security for the East, for ourselves and for the world," he said. "It is a task as thoroughly defeated as Germany."

He said, "We are approaching the end of the struggle with Hitler. We are only beginning the struggle to save civilization. . . . We shall many of us, I hope, be taking off our uniforms and going to work on the fighting or let the sword sleep in our hands."

Based on published construction and loss statement, the Allies probably gained about 3,500,000 net tons of losses since May 1 through the building program alone.

Another estimated 3,000,000 tons was made available through the closing of the Mediterranean shipping route, eliminating longer hauls to Ceylon and India.

STABILIZING SICILY

Banks All Over The Island Are Open For Business

ALLIED HEADQUARTERS, North Africa.—The Allied military government for occupied territories announced that banks all over Sicily have reopened, supported by special military currency brought in by occupation authorities.

Each province was given the right to withdraw up to 5,000 lire (\$50), but no bank runs marked the opening. Officials said they hoped unlimited withdrawals could be arranged soon.

ESSENTIAL SHELLAC

Can Be Recovered From Old Phonograph Records For New Recordings

A unique plan for replacing short stocks of an important raw material through tapping a huge source of dormant supply now available in Canada has been worked out by the Air Cadet League and the Royal Canadian Air Force, in co-operation with a large manufacturing concern. It was announced from Air Cadet League Headquarters, Ottawa.

To help the R.C.A.F. obtain a new series of music appreciation programs the Air Cadets of Canada are embarking on a Dominion-wide round-up of old phonograph records from which essential shellac can be recovered for production of new records. This is part of a plan designed to produce and circulate carefully selected programs of music recordings to air stations and flying schools throughout Canada.

One of the necessary ingredients in making phonograph records is shellac, an imported resin that comes from the Orient. There is a great shortage of this important commodity but it can be obtained from old records of which it is estimated there are scores of thousands lying around unused and gathering dust in Canadian homes.

Air Cadet squadrons all over the Dominion have taken on the job of gathering at least 20,000 of these old or broken phonograph records or as many more as available. Used in making up new ones for the R.C.A.F. Through the co-operation of the manufacturers the Air Force will be credited with the shellac in the old records and production of new special programs made possible. Collection of old records will be carried out between September 13 and October 16. The co-operation of those who have old or broken records now unused in turning them over to the Air Cadets will help the boys to attain their objective and provide necessary shellac for the production of new recordings. There are more than 300 squadrons in Canada with a total enrollment of nearly 20,000 Air Cadets. The boys of each squadron will organize and canvass their own districts, being responsible for collecting all the old records they can obtain and their shipment to designated receiving stations. If every Air Cadet in Canada is to help, the cure at least one old record during the campaign the success of the project will be assured, it was stated. It is hoped by the Air Cadet League that this practical project for providing a worthwhile service to flying schools through the help of the Air Cadets will receive generous support from the people of Canada.

In British House

Many Of The Members Of Commons Are Brilliant Linguists

Sir Stafford Cripps, the leader of aircraft production, astonished even many of his supporters in Britain by speaking fluent German in a foreign broadcast on the radio. He is one of the many linguists in common.

Col. L. C. M. S. Amery, secretary of state for India, has made foreign broadcasts in German, French, Greek, Turkish and some Slavonic tongues. Sir John Anderson, who presides at his education in Germany, probably still speaks German fluently, and Dr. Leslie Burgin, former transport minister, speaks every European language.

GEMS OF THOUGHT

FREEDOM

But what is Freedom? Rightly understood, A universal license to be good.—Hartley Coleridge.

The God who gave us life, gave us liberty at the same time.—Thomas Jefferson.

Whatever enslaves man is opposed to the divine government. Truth makes man free.—Mary Baker Eddy.

Whoso looketh into the perfect law of liberty, and continueth therein, he being not a forgetful hearer, but a doer of the work, that man shall be blessed in his deed.—James 1:25.

If the true spark of religious and civil liberty be kindled, it will burn. Human agency cannot extinguish it.—Daniel Webster.

The cause of Freedom is the cause of God.—Bowles.

MINING MACHINERY

Gen. K. C. Applegate, who was chief engineer to the British army in France, is now in the United States negotiating for the mining machinery by which Britain hopes to obtain 20,000,000 tons of coal from open pits next year. It was disclosed. The present annual output is about 5,200,000 tons.

Superb Eighth Army

General Montgomery Commands One Of Finest In Military History

The Buffalo Courier-Express says: It was quite according to Hyle that Gen. Montgomery's superb Eighth Army—now including both British and Canadian troops—was picked for the job of spearheading Allied invasion of the European continent. When it comes to actual battle experience, Montgomery's Eighth is the senior army in Gen. Eisenhower's Mediterranean command. It is more than that. It is one of the finest armies, in hitting power, in discipline and in morale, to be found on any page of military history.

But one of the principal reasons—and perhaps the most splendid reason—for Allied success in the Mediterranean fighting can be found in the absence of jealousy and friction between component parts of Gen. Eisenhower's command. True, there is the usual soldierly rivalry, not merely among Americans, Britons, French and Canadians, but between different units within each of these nations' armed forces and among the various branches of service, land, air and sea. But such rivalry remains within the healthy bounds customary in all well-knit armies of high morale.

So American soldiers, French soldiers, and British and Canadian soldiers of other units of the Eighth Army, all must concede Montgomery's men their well-earned right to spearhead the invasion—and, at the same time, must look forward eagerly to the time when they, themselves, will show the Germans some new rough stuff that even Monty's boys have not yet shown them. That time obviously is in the very near future.

Soda Water

Little History About The Evolution Of Soft Drinks

We owe soda water, which Lord Woolton says we must learn to do without for a time, to one of the greatest of English chemists, for the chances are that no one would have been more surprised than Priestley could have foreseen what would grow from his experiments in 1772 in making an aerated water resembling the natural mineral waters of this and other countries. It was in 1790 that Paul began in Geneva to manufacture that aerated water on a large scale, and he was followed in London by Schweppe. Then in 1807 a Philadelphia doctor named Physick conceived the happy idea of getting a chemist, a chemist from the same city, to manufacture it for the use of his patients. Spessman went one better and favored it with fruit juices, and from that sprang the huge soda-fountain industry in America.—Manchester Guardian.

For American Troops

What Britain Has Provided For Troops In United Kingdom

Between June, 1942, and April, 1943, Britain provided for American troops stationed in the United Kingdom 1,360,000 ship tons of supplies and equipment and 2,170,000 tons of construction materials.

Before the day of Lend-Lease, the British government poured about \$775 million (\$1,665,000,000) into the American Aircraft Industry, and spent some \$48,250,000 (\$102,000,000) directly in capital assistance to American corporations making aircraft, tanks and guns.

BOUQUET FOR CANADA

The New York Journal-American has a bouquet to Canada as an ally who "has continued to carry and to augment her share of the load in a manner that none of our Allies has done; for it is an outstanding fact that Canada does not receive lend-lease aid from this country."

Quite A Vegetable

Beans Can Be Used In Any Number Of Ways

The bean is quite a vegetable. Any kind of bean, yellow, green, stringless, pile, bush or lima. It's full of vitamins, ascorbic, and it is packed with nutrients of the protein persuasion. Green, it has a certain succulence. Dried, it can serve as a satisfactory stand-in for absent meat. It even has a beautiful blossom.

A whole garden full of beans would be monotonous, but it would pay its way. Particularly if the gardener had no liking for broccoli or parsnips. What can you do with a parsnip but butter it, or stew it away to be buttered later with rationed butter? Or with broccoli, but eat now or can it and eat it, substantially the same later. Even potatoes have their limitations.

But beans! Those who go in for that kind of hay make salads of young bean leaves. When the pods appear, you have green beans by the peck. When the pods toughen and you are full to the brim and quite satisfied with green beans, you can let them run their course and hull them out as dried beans. No canning. No salting down. No pickling. And when the snow flies you can boil them or bake them or make bean soup of them, soup full of tang and flavor and nourishment that sticks to your ribs.

Yes, the bean is quite a vegetable. And doesn't the bean beetle know it, too!

A REAL LETTER

When Fred Billows, a young Winnipeg lad with the R.C.A.F. in North Africa, writes a letter home he really goes to work. A letter received by his parents stretched five feet in length and was written in long hand on both sides of the paper. In addition to many of his experiences, the letter included 45 snapshots which he took and developed himself.

WHERE MEN EXCEL

Stephen Potter, who selects broadcasters for the BBC, says there are very effective women broadcasters because of the constitution of a woman's voice and the qualities of the radio.

Wounded Allies Fraternize At Palace Garden Party

British and American soldiers, wounded during the North African and Sicilian campaigns, shown fraternizing at a garden party held in their honor at Buckingham Palace, London. Left to right are: Private A. J. Parnes, London; Sergeant P. Whitlock of Staines; Gunner J. J. Gray, London; Staff Sergeant Joseph S. Kianick, Pittsburgh, Pa.; Staff Sergeant Alfred J. Vickers, Chicago, Ill.; and Staff Sergeant C. R. Kierker, Toppensh, Washington.

HOME SERVICE

HERE ARE MANY SMART THINGS MADE WITH PAPER

Smart Lamp-Shades

Here you see a young lady with very little material, making a smart lamp-shade. Not as difficult as it seems, this is just one of the many attractive things you can make with paper.

Our 32-page booklet tells you how to be an artist with paper. Even if you cannot draw, you can use a ruler, snip with scissors, apply paste and paint.

Easy directions are given in the booklet for making things to brighten your home; to add a smart note to your wardrobe; to amuse the children; to give your next party that different touch.

Clever paper sculpturing and all-housethings are also included in the booklet. You'll be surprised and delighted at the many things you can make with paper—smart things that will cause your friends to exclaim!

The amount of material needed is practically negligible depending on the type of paper you wish to use. All materials are discussed in the booklet.

Send five in coins for your copy of "Decorative and Useful Things to Make With Paper" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. Be sure to write plainly your name, address, and the name of booklet.

Corn is now being used to make strong glass cloth used for bomber brake linings.

To Quench Thirst

Seamen Verify Tip Gives By Benjamin Franklin In 1761

Torpedoed seamen who clamber over the sides of lifeboats into the sea to soak their bodies and so relieve their thirst, are using a suggestion made almost 200 years ago by Benjamin Franklin.

Dr. Henry B. Allen, director of the Franklin Institute, has a carefully preserved letter Franklin wrote in 1761 to a Miss Mary Stevenson, in which he said:

"It is certain that the skin has imbibing as well as excreting pores. . . I have often observed myself that however thirsty I may have been before getting into the water to swim, I am never thirsty so long as I am in the water. These imbibing pores are very fine, however, perhaps fine enough in filtering to separate salt from water. . .

"I imagine that if people at sea, distressed by thirst when their fresh water is unfortunately spent, would make bathing tubs of their empty water casks and, filling them with sea water, sit in them an hour or two each day, they might be greatly relieved. Perhaps keeping their clothes constantly wet might have an almost equal effect; and this without danger of catching cold. Men do not catch cold by wet clothes at sea."

EDUCATION IN CITIZENSHIP

More than 10,000 full-time and part-time Civil Defence workers in Great Britain are to receive a course called "Education for Citizenship."

The scheme has been launched by the Workers' Educational Association, a federation of nearly 2,000 teaching organizations. Tutors at the course will be university professors, teachers and eminent politicians.

THE WRONG COLOR

The London Sunday Express says: If you and Sweden are the only neutrals countries operating an air line to Britain at present, but the Irish do not like it and have made an informal protest. The reason is all neutral civil planes have to be painted the same color and the chosen color is orange.

When placed under any super-pressure, lubricating oil becomes as hard as steel and water can be compressed to half its normal volume.

Health LEAGUE of CANADA

present TOPICS OF VITAL INTEREST

ARTIFICIAL RESPIRATION

A husky-looking man walked up to Dr. Gordon Bates, general director of the Health League of Canada, in Toronto the other day, and said, "Dr. Bates, I'm the chap who should have died when lightning hit me during the last war."

The man was George H. Parker, building maintenance employee of the Toronto Transportation Commission, and he referred to a story Dr. Bates told recently on the national network of the C.B.C. when the health league director spoke on artificial respiration.

Parker's rescue was due to artificial respiration, prolonged application of which has saved victims of electrical shock as well as people involved in water accidents.

He was a member of the 48th Canadian Highlanders and was in camp at Niagara on a summer's day in 1918. A file of 80 men was standing by bayonets fixed, with rifles over their shoulders. The two men at opposite ends of the file had grounded their rifles. Lightning hit the bayonet of the man at one end, and jumped across the intervening 28 bayonets to the man at the other end.

All 80 men were knocked out. A medical officer who was present, with the idea of demonstrating artificial respiration, ordered a sergeant with his squad to undertake the Schaefer method of resuscitation on one of the apparently dead men.

It was Parker, one of the end men who to everyone's astonishment showed signs of life after an hour's work, and finally sat up. No rescue work was attempted on the man who had been at the other end of the file, as no one had any idea it would be successful. "I don't think artificial respiration would have brought him 'round. He was burned black," Parker said.

Parker, now 52, was a private in the 123rd Battalion. He recalled that his company was drawn up beside Brock's monument at Niagara after a route march from camp.

Telling the story after 27 years, he said:

"It was raining like blazes, and the lightning was terrific. The monument was hit, and some chap in our file was hit in the chest, and then I suddenly felt myself falling. It was a sensation just like one had a little while before when I'd been given chloroform for an operation. I knew I was lying on the ground and I could hear the officer say, 'No use working on him, he's dead,' and heard the sergeant say, 'The deuce he is!'

"After that I did not know anything until I came around. They told me it was about an hour later. I felt foggy, but all right, and I wouldn't get in the ambulance. I marched back to camp, and I was sore afterwards, because several of the boys who were taken there by ambulance got week-end passes and I didn't."

Parker said a number of the bayonets were twisted by the lightning. He showed a smooth spot on his forehead where for a full year he carried a lump as big as an egg. "I guess that's where the lightning smashed me," he said.

Dr. Bates was delighted to meet the walking proof of his contention that artificial respiration should be started and kept up even if the victim appears dead. It should be continued until rigor mortis sets in.

BARGES ARE SPEARHEADS OF INVASION

Outside landing barges like the one pictured in the crossing to the Italian mainland. This barge graphed off the coast of Africa. Note the party here are spearheads of invasion and were probably used with troops standing shoulder to shoulder.

TOWN AND COUNTRY
PERSONALOGRAPHS

Mrs. Scirry has returned to her home in Carbon after spending the past few weeks visiting friends and relatives in the Nanton district.

Francis Foxon of the RCAF, Edmonton, visited in Carbon last week with his parents, Mr. and Mrs. Len Foxon.

Flight Sergeant Sammy Malton, who was reported missing in action last March, has now been reported as a prisoner of war in Germany.

Raymond McMann of the RCAF, who has been stationed at the coast, is spending a furlough in Carbon with his wife and family.

Dr. and Mrs. A.J. Wright and son Blake, arrived Saturday from Vernon B.C. and will spend a two-week vacation with relatives.

Helen Meddel of the Women's Division of the RCAF, stationed at High River, visited at her home here over the week end.

Mr. and Mrs. W.H. Edwards and daughter of Calgary spent Sunday in town with Mr. and Mrs. Percy Edwards.

Mr. and Mrs. Len Poonen motored to Calgary Sunday, taking their son Francis in to catch the midnight train for Edmonton. They returned to Carbon Tuesday.

Betty, Shirley and Beverly Woods have returned to Beaver after spending the summer with relatives in the Horrocks district.

Chas. "Manny" Nash, who has a job as pork trimmer at Burns in Calgary, spent the week end in town with his mother, Mrs. Kathleen Nash.

AC Reginald Morris, and LAC Eric Poonen, No. 37 SPTS, Calgary arrived Friday and spent the week end at the home of Mr. and Mrs. C. Graham.

A week ago we published a report on the yield of wheat off 800 acres of the Schell brothers land. This land is farmed by four brothers, Edward, Fred, Albert and Gideon.

With the rise in the wheat price most of our delinquent subscribers should be in a better position to pay their arrears to this paper. We would be glad to have these small accounts cleaned up as soon as possible.—The Carbon Chronicle.

Of the 33,000,000 people in Great Britain between the ages of 14 and 65, 25 million are employed in the war effort, either in the armed services or in industry. British war industries are thus scraping the bottom of the barrel and about the only possibility left for increasing the labour supply for war industries is in refinements in the use of the labour now fully employed.

JUST ANOTHER TALL ONE

Grizzly Dan stories about the trained bear have caught the fancy of the younger generation, and here's one by a young 13-year-old that might be interesting.

Way back in 1871 I was going prospecting in the Rockies. I had four pack horses besides my saddle mare, and one night I unpacked the horses and hobbled them in a meadow. I enjoyed a nice supper of snags, and trout that I had caught in a stream nearby.

After that I went to bed. In the middle of the night I was awakened by a blood-curdling roar of a grizzly. Then I saw two eyes looking at me. I wasn't afraid—I grabbed my lasso and rode her. She dropped me about six miles before I got her tamed down so I could ride her, and then we headed back for camp. On arriving I saw that another grizzly and three cubs had entered my camp, and all I salvaged of things was a box of prunes, my rifle and saddle.

It was just getting light so I went after my horse, but all I found was the remains of the saddle mare. The pack horse had vanished. I went back to camp, saddled up Jeanie (my bear) and started on my way. That afternoon I saw several elk playing on a peak. I needed meat, but on looking for my back-shot, I found it gone. So I shooed on a grizzly and loaded up the old muzzle loader with the prune stone, took careful aim and hit a young bull in the neck. He dropped like a rock. We had a good feed that night, and a rare treat. The meat was deliciously flavoured like prunes. Jeanie agreed with me.

Ralph Atkinson, who is stationed with the RCAF at Macleod, spent the week end with his parents, Mr. and Mrs. John Atkinson.

Mr. and Mrs. Jas. Smith and Roy of Drumheller were Carbon visitors Sunday.

Mr. and Mrs. R.C. Downey of Carstairs, and Miss Lorraine Downey of Olds, were in Carbon Sunday to attend the memorial service at the Carbon United Church for Sgt. Gunner W. Cameron and Sgt. Pilot H. Barker.

Doris Gobel of the C.W.A.C. arrived in town Saturday and spent the week end with her parents.

Mrs. Ernie Nelson and family of Longview are visiting this week with Mr. and Mrs. John Atkinson.

Mr. and Mrs. Hugh Cameron and son of Drumheller were Carbon visitors Sunday.

Mr. and Mrs. Bob Greenhalgh of Calgary were Carbon visitors last week.

The stirring drama-packed story of brave, gay, fun-loving Anne Jones, who might be any one of the 12,000 Canadian girls now serving in Air Force blue.

Economical Housewives

There was a day when the housewives bought the faraway "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things. Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in CARBON

Income tax and super tax on the people in Great Britain now have an largest incomes in Great Britain take income, after taxes are paid, of more than 97 1/2 % of the gross income. Only 80 than £20,000 (about \$26,000).

LET'S BE DOING ... while we're planning

● Everybody is thinking a great deal about the future these days . . . planning . . . getting ready for the period to follow the war. All realize that the war may bring surprises—but the tide is turning in our favour.

Chemists and engineers, producing things needed for war, are making discoveries which will mean comforts and conveniences for all of us when peace comes. New methods of making things, new processes, new materials, now being filed away in blue prints and formulae, will bring us many new and useful articles. Many things not available now will be replaced by better models and designs.

You may have plans for a new home, remodelling your present home, new home furnishings. If you are a farmer you will need new and improved equipment and machinery.

Now, while you are thinking and planning, you can do something to insure that your plans can be carried out. Victory Bonds—which can be bought on convenient instalments, with money as you get it—provide a means of keeping your savings intact, earmarked for things you want.

Most Canadians are saving money. Most of us are buying Victory Bonds and when we buy Victory Bonds we are helping to win the war. We are helping to speed the day of victory and we are doing something that will benefit ourselves.

WHAT IS A VICTORY BOND?

A VICTORY BOND is the promise of the Dominion of Canada to repay in cash the face value of the Bond on the date of maturity with half-yearly interest until that time. A Victory Bond is the safest investment in Canada backed by the entire resources of the Dominion. Canada has been issuing bonds for 75 years, and has never failed to pay every dollar of principal and interest when due. A Victory Bond is an asset readily marketable at any time.
